Profile

Modern products required modern solutions,

Dark-theme fan, product manager, project manager, developer lead.

Employment history

Front-end Developer

Using the React and Native library for building modern projects

Product manager

Re-building from zero a website and providing a whole solution in less than a month. Increasing the revenue and income of the company with a fast and modern website

Customer success manager

Phone, emails and face to face interactions for customers, increasing the positive numbers up to 40% more for an European E-commerce.

Education

Zero to Mastery

E-school with a massive community of more than 10k developers around the globe. Providing courses for all the skill I have and reinforcing senior knowledge for the best practices
